MARIE MOON

ABOUT THE ARTIST

Marie Moon is a Berlin / Germany and Tulum/Mexico-based multi-disciplinary artist.

Her body of work delves deep into the intricacies of the human condition, exploring identity, cultural and historical imagery, iconography, and the inherent and artificial narratives culminating into the vast tapestry of human experience in this oversaturated, highly polarised time. Her visual poetry captures surreal narratives that reflect society and contemporary concepts and realities. She transcends beliefs, concepts, and identities that influence our very being using various media.

From 2015 to 2017 I was represented by the Gallery Lamberts Fine Art, a notable New York gallery. This period marked a significant turning point in her artistic career, as her work gained international exposure, including notable exhibitions during Art Basel in Miami.

Adding to her long list of international exhibitions in Los Angeles, New York, Berlin, and recently Rio de Janeiro during the Art Rio '22. In pursuit to expand her creative horizons and to share her work with diverse audiences, she constantly embarks on extensive periods of travel through Europe and the Americas taking part in exhibitions and art residencies.

As a multi-disciplinary artist, she explores various mediums, including collage, de-collage, painting, photography, audiovisual installation, sculpture, writing, and poetry.

She creates large scale video art installations and live visuals for concerts and is an experience set and stage designer.

Her more than 13 year experience in the cultural realm as a curator, gallery director, art residence manager, retreat coordinator and producer lead her to reinvent the art of gathering.
